

# LT AND LV ENGINES

## LT1, LV1

*Power ranges: 1.0—7.4 kW; 1.3—9.9 bhp*

*Variable speed builds, full load speed range: 1000—3000 r/min*

*Fixed speed builds: 1500 or 3000 r/min*

### DURABLE, RELIABLE, VERSATILE SINGLE CYLINDER AIR COOLED DIESEL ENGINES

#### SPECIAL ATTRIBUTES

- designed for continuous operation in ambient temperatures up to 52°C (122°F)
- oil cooling by means of air flow over deep crankcase finning
- clockwise and anticlockwise rotation builds available

#### BASIC ENGINE CHARACTERISTICS

- single cylinder
- diesel fuelled
- direct injection
- air cooled
- naturally aspirated

#### DESIGN FEATURES AND EQUIPMENT

- air cleaner (type according to application)
- inlet and exhaust manifolds
- self-vent fuel system (LV1 only)
- self-regulating plunger type lubricating oil pump
- decompressor lever
- flywheel with cooling fan
- sheet metal or cast SAE 5 fan shroud depending on build
- mechanical governing
- hand start (electric optional)
- 250 hour service intervals
- operators' handbook

#### EMISSIONS

- complies with EU Stage 3A emissions regulations.

LT1 SHOWN WITH THE OPTIONAL FUEL TANK & SILNECER FITTED

#### OPTIONAL ITEMS

- 12V electric start
- fuel tank (5 or 8 litre) with filter
- fuel filter
- silencer
- lifting eye (LV1 only)

A range of options allows you to select a specification that matches your requirements; please consult your Lister Petter distributor.

#### WARRANTY

- standard: two years from manufacture
  - optional: five-year limited warranty
- Conditions apply.

**RATING DEFINITIONS, TO ISO 3046**

**1. Fixed speed power: continuous power (ICN)**

The power in kW which the engine is capable of delivering continuously at the stated crankshaft speed, under conditions of 100 kPa barometric pressure, 30% relative humidity and 25°C air inlet temperature, provided that the engine is overhauled and maintained in good operating condition and that fuel to BS EN 590 Class A1 or A2, and lubricating oils to the correct performance specification and viscosity classification as recommended by Lister Petter Limited, are used.

**2. Fixed speed power: overload power (ICXN)**

The maximum power in kW which the engine is capable of delivering intermittently at the stated crankshaft speed for a period not exceeding one hour in any period of twelve hours continuous running, immediately after working at the continuous power, under the conditions specified in (1) above.

**3. Variable speed: fuel-stop power, continuous power (IFN)**

The maximum power in kW which an engine is capable of delivering continuously at stated crankshaft speed, under the conditions as specified in item 1, with the fuel limited so that the fuel stop power cannot be exceeded.

**4. Variable speed: fuel-stop power, intermittent power (IOFN)**

The maximum power in kW which an engine is capable of delivering intermittently at the stated crankshaft speed, for a period not exceeding 1 hour in any period of 12 hours continuous running immediately after running at the Continuous Fuel Stop Power rating.

**5. De-rating**

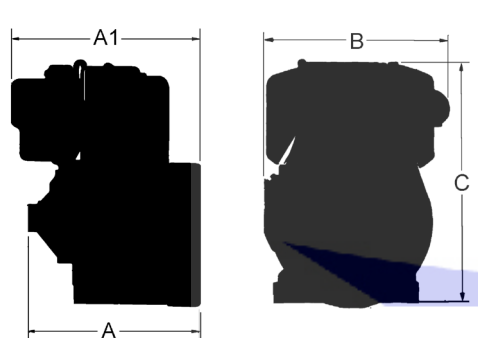

For non-standard site conditions, reference should be made to relevant BS, ISO and DIN standards.

The overload capability applies to a fully run-in engine. This is normally attained after a running period of about 50 hours.
